Exercise: Rotation of magnetization

- Solve the Bloch equation for

$$\vec{B}(t) = (h \cos \omega_0 t, -h \sin \omega_0 t, B^0), \quad 1/T_1 = 1/T_2 = 0, \quad \vec{M}(t=0) = (0, 1, 0)$$

$$B^0 = 2\pi f_0, \quad f_0 = 4$$

$$h = 2\pi f_1, \quad f_1 = 1/4$$

$$\gamma = 1 \rightarrow \omega_0 = B^0$$

→ For $t = 1$ a $\pi/2$ rotation is made:

$$\vec{M}(t=0) = (0, 1, 0) \rightarrow \vec{M}(t=1) = (0, 0, -1)$$

Use 100 steps to “resolve” f_0

Repeat for more time steps to see the time evolution

Plot $M^x(t), M^y(t), M^z(t)$

Exercise: Rotation of magnetization

- Repeat the calculation for $1/T_1 = 0, 1/T_2 = 1$
- Repeat the calculation for $1/T_1 = 1, 1/T_2 = 0$
- Repeat the calculation for $1/T_1 = 1/T_2 = 1$
- Repeat the calculation for other rotations and different begin orientation:

e.g. $\vec{B}(t) = (h \cos(\omega_0 t + \varphi), -h \sin(\omega_0 t + \varphi), B^0)$ with

$\varphi = \pi / 2$ or $\varphi = \pi / 4$ and $\vec{M}(t = 0) = (1, 0, 0)$

$= (0, 0, 1)$

$= (1, 0, 1)$

Exercise: Rotation of magnetization

- Example for $1/T_1 = 0, 1/T_2 = 1$ and $\vec{M}(t=0) = (1, 0, 1)$

Report

Ms. Vrinda Mehta

v.mehta@fz-juelich.de

Dr. Madita Willsch

m.willsch@fz-juelich.de

Dr. Fengping Jin

f.jin@fz-juelich.de

- Filename: **Report_9_Surname1_Surname2.pdf**, where Surname1 < Surname2 (alphabetical order). Example: Report_9_Jin_Willsch.pdf (Do not use “umlauts” or any other special characters in the names)
- Content of the report:
 - Names + matricule numbers + e-mail addresses + title
 - **Introduction**: describe briefly the problem you are modeling and simulating (write in complete sentences)
 - **Simulation model and method**: describe briefly the model and simulation method (write in complete sentences)
 - **Simulation results**: show figures (use grids, with figure captions !) depicting the simulation results. Give a brief description of the results (write in complete sentences)
 - **Discussion**: summarize your findings
 - **Appendix**: Include the listing of the program

Due date: 10 AM, July 9, 2024
